

ELECTRA USER MANUAL

Description:

The Electra V1.0 is a cleverly designed Stun Gun cum-Flashlight. Crafted from Military-grade aluminium alloy is a durable and powerful self defence tool. Its powerful 3.8 Million volts Stun Gun is effective even through a layer of clothing. It uses a high-frequency oscillating circuit to improve output current. It comes with a bright flashlight illuminating up to 150 meters.

Specifications:

Power Supply: Built-in Battery
Discharge: 50000Kv
Input Voltage: DC 4.8v
Current Consumption: 2.5A
Light: 210 Lumens
Height: 165 mm
Diameter: 28mm
Net Weight: 180g
Charging Time: 4-6hours

Instructions:

Before using it for the first time, connect the device with the charger to an 4.8V outlet for 8 hours.

The device comes with two activation modes:
The flashlight comes with two modes, push the toggle upwards for flashlight mode and downwards for stun gun mode. The Stun Gun Mode is only activated when the safety lock on the bottom of the device is disabled and placed in the ON position. While is Stun Gun Mode press the metal component at the flashlight end of the device and press down on the stun gun trigger.

Do not use the device while it is charging. Using the stun gun for more than **30 seconds** continuously could affect the life of the device.

Warning: Keep away from children and pets. Do not use on individuals suffering from heart diseases.
