

FUTURE

# XGUARD

TECHNOLOGY

TAKE CONTROL OF YOUR SKY

# Smart and Powerful

---

## Hyperlink to X-Eye

Combination with near zero false alarm and IFF (Identification Friend or Foe) capability in X-Eye

## Smart & Automatic

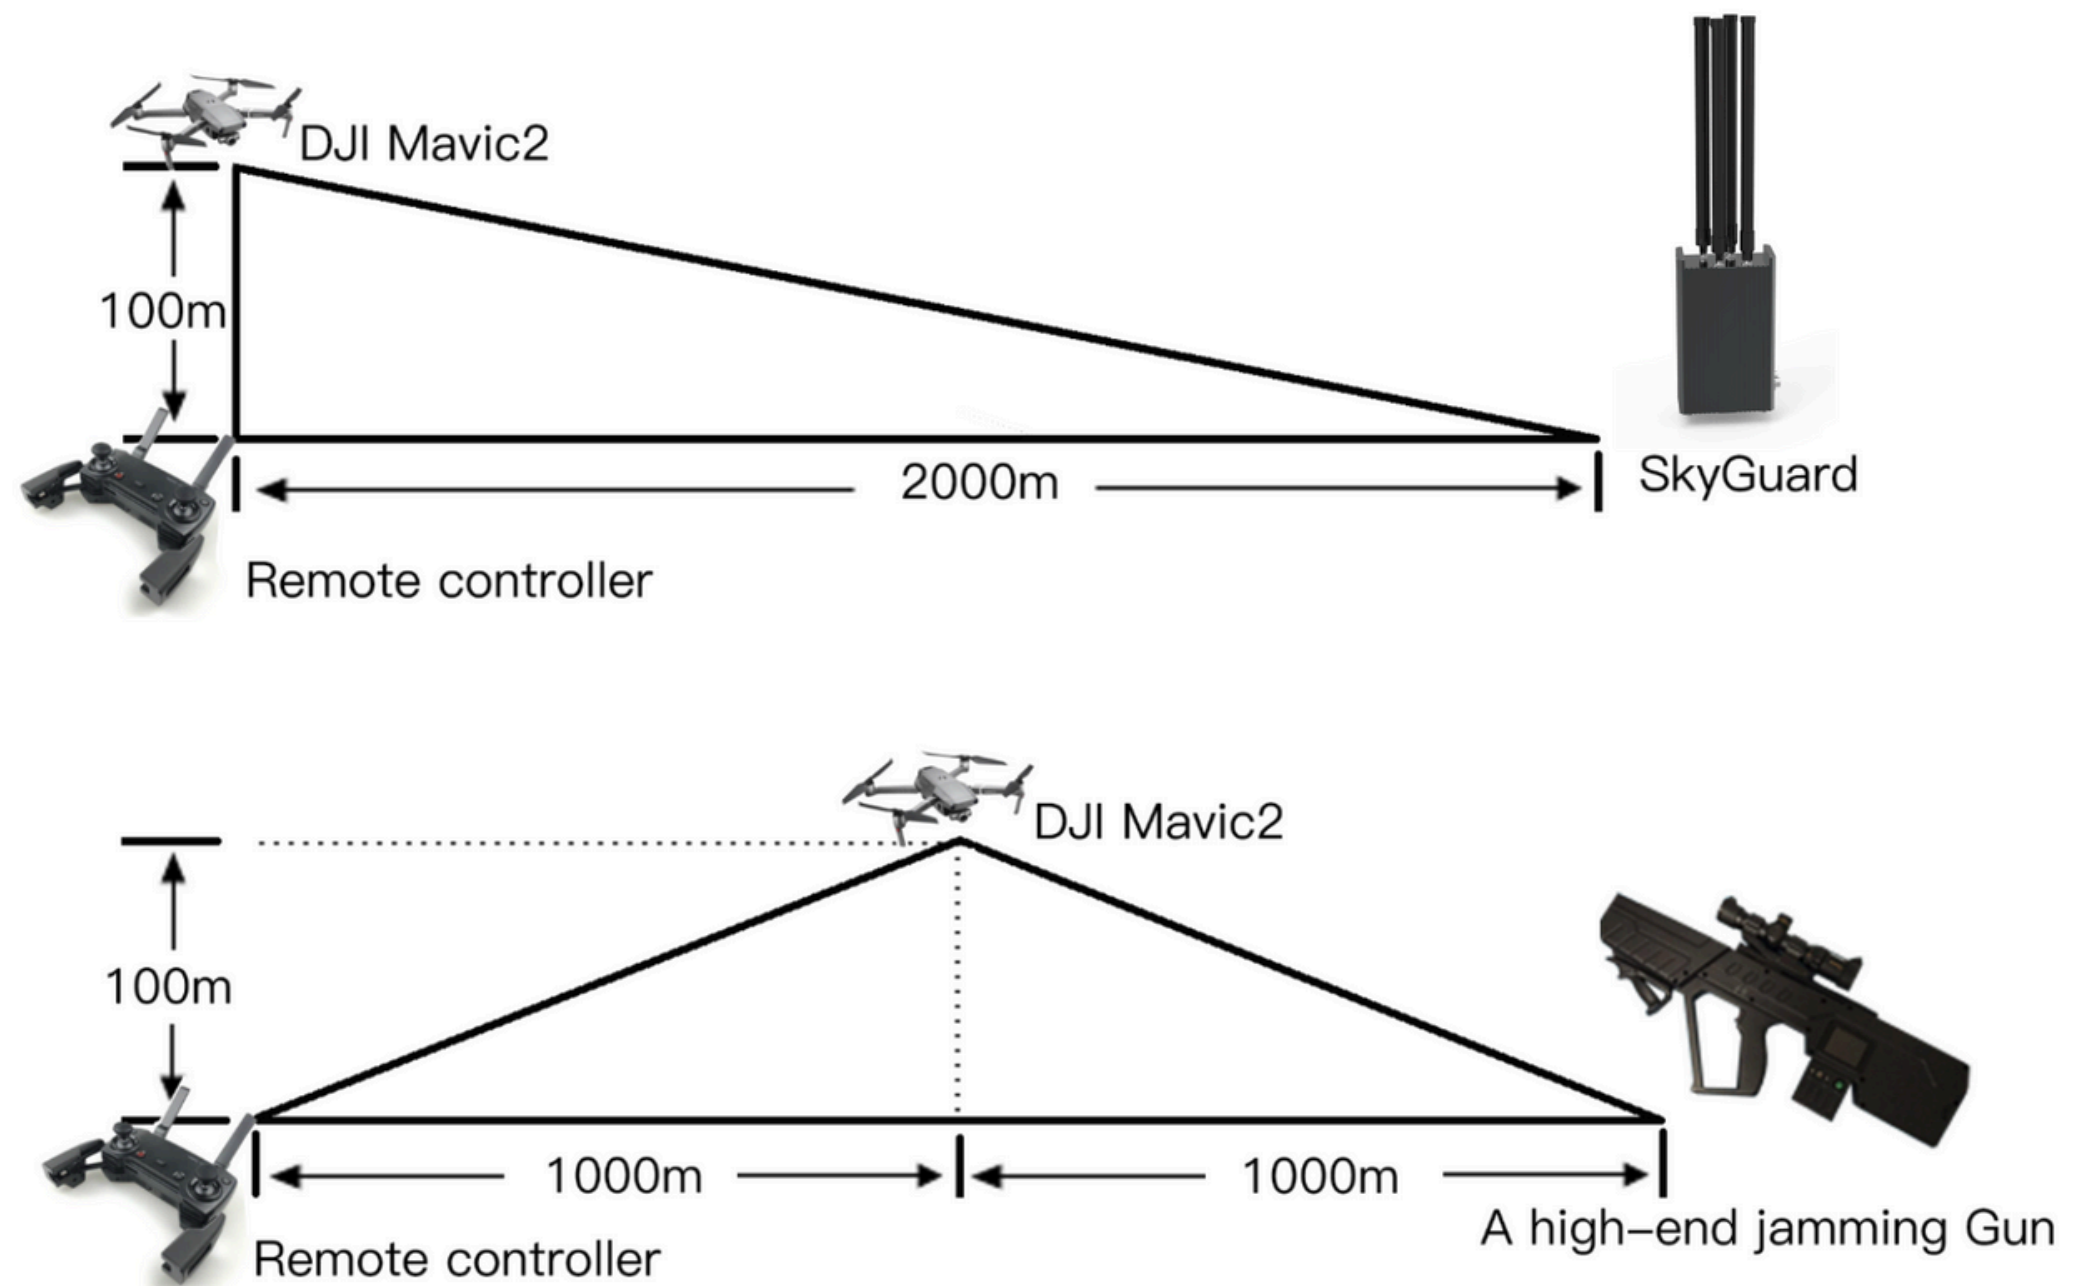

XGuard can provide 24/7 autonomous defense operations

## Multiband Support

XGuard supports consumer and commercial ISM frequencies

# Powerful Defense

XGuard is more powerful than any other jamming device for the counter-drone purpose. When the drone is close to its remote controller, the controller signal power at the drone is higher than the jammer's power, making the jamming device ineffective. However, this is not the case with XGuard's powerful defensive capability. No matter how close the drone and its remote controller are, the user will rest assured. XGuard's Jammer-to-Signal distance (J/S) ratio exceeds 20:1.

# Specifications

## Product

**Defense Range**

Up to 3 km radius

**Defense Angle**

Full 360 degrees, all airspace

**Weight**

12 kg

**Dimensions**

120 mm (width)

405 mm (height)

240 mm (depth)

**Operating temperature**

-20°C to 60°C

**Power Supply**

AC 100 ~ 240W

**Frequency Bands**

Consumer and commercial ISM frequencies

# Thank You
