

DJI LITO 1 (SERIES)

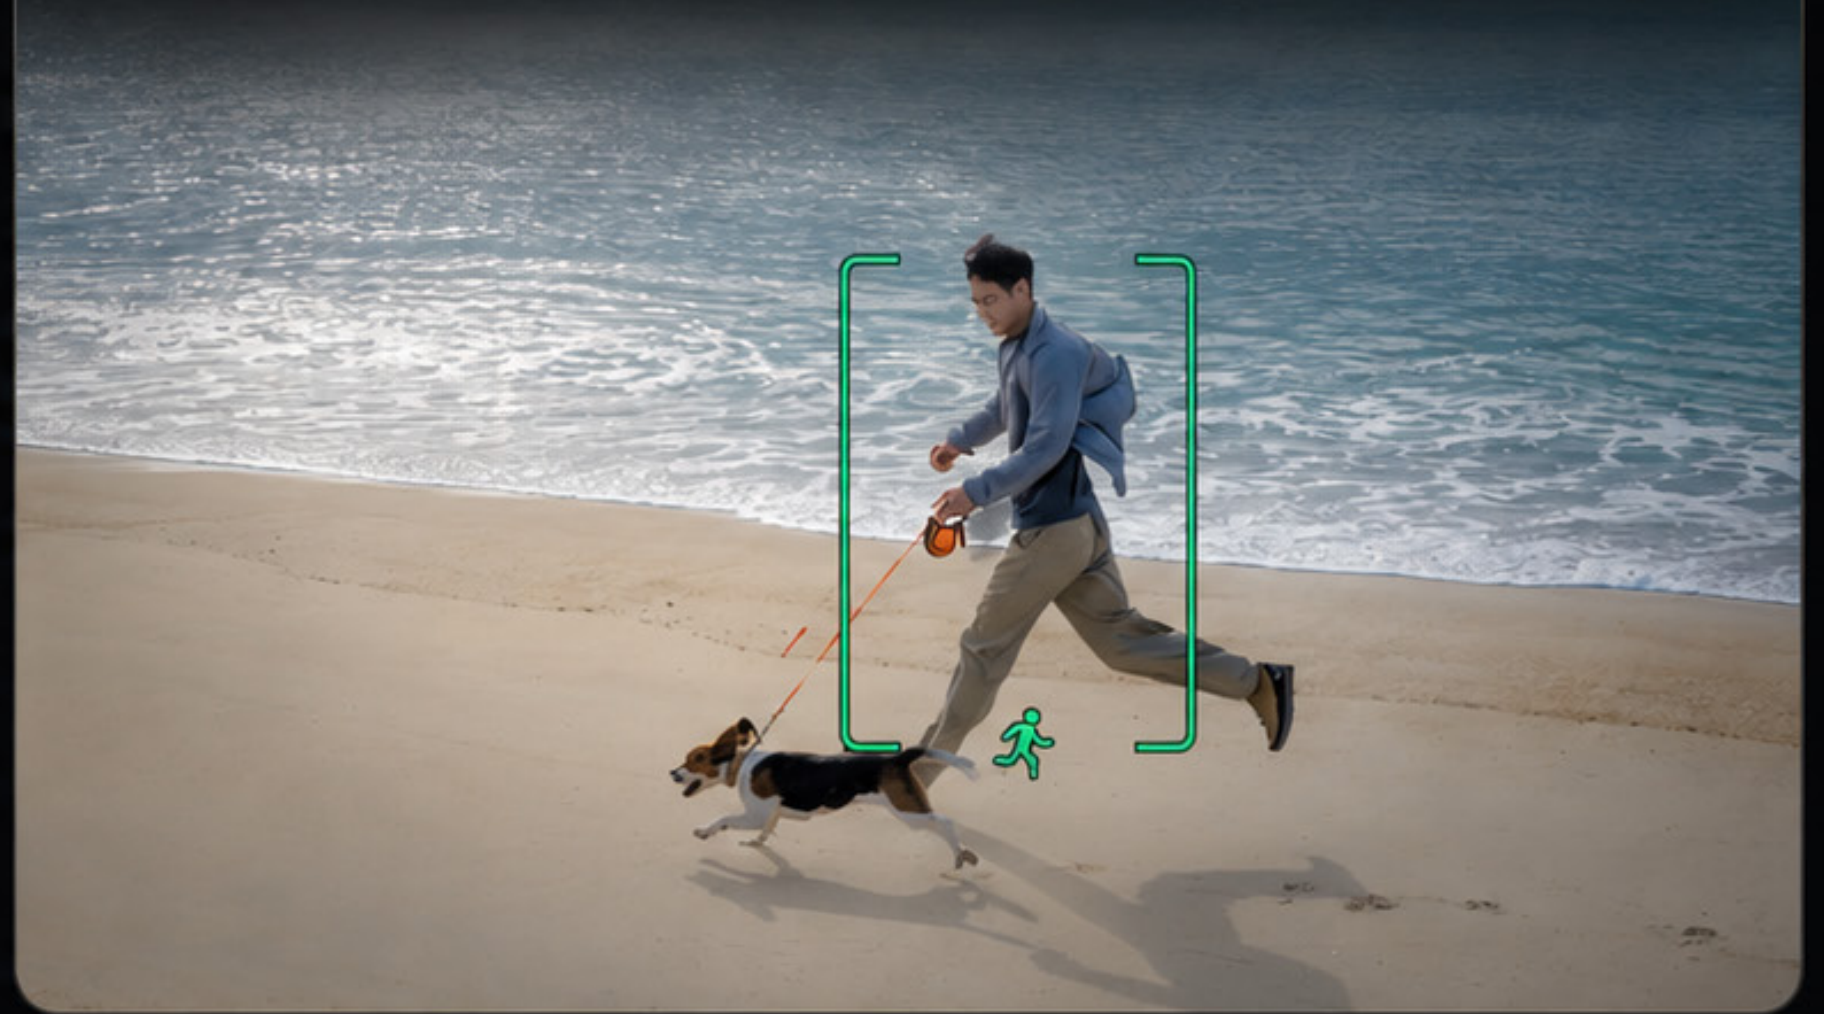

DJI Lito 1, an easy-to-use camera drone for beginners. Omnidirectional obstacle sensing^[1] helps you fly with peace of mind, while ActiveTrack^[2] keeps your subject in frame during the flight. With a powerful imaging system and smart camera moves, even a new pilot can easily take impressive videos. Forget the complexity—just take off and start creating.

Omnidirectional Obstacle Sensing^[1]
Fearless Flight

ActiveTrack^[2]
Easily Unlock Cinematic Shots

01

4K Video ^[3] 8K Image ^[4]

Capture every detail with stunning 4K video and 8K images, delivering exceptional clarity and vibrant colors.

02

Under 249 g ^[5] Lightweight and Portable

Weighing less than 249 g, Lito 1 is easy to carry anywhere, making it your perfect travel companion.

03

Ample Flight Time ^[6] for Continuous Creation

Enjoy extended flight time to explore more, capture more, and focus on your creativity without limits.

04

15km Video Transmission ^[7] Stable and Smooth

Experience reliable 15km transmission for stable, smooth, and clear live feeds.

DJI LITO 1

Light, Compact, and Ready to Fly

Weighing under 249 g^[5], DJI Lito 1 lets you fly without registration or exams in most countries and regions^[5]. Folds down to palm size and slips easily into your backpack, so you can travel light.

Under 249 g^[5]
Ultra-Light Design

Pocket-Friendly

Travel Light
Take It Anywhere

8K Photos^[4] Rich in Detail

Capture beautiful moments in up to 8K resolution^[4]. These photos retain sharp, rich details even when zoomed in or cropped. Whether shared instantly or edited in post, the images deliver impressive depth and a premium look, making it effortless to capture high-quality shots.

8K
ULTRA HD

8K Resolution^[4]

Capture every detail with stunning clarity.

Richer Details

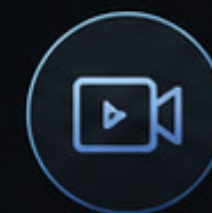

Sharp, vibrant, and true to life.

Zoom & Crop Ready

Retain exceptional quality, even up close.

High-Quality Videos for Big Moments

4K/60fps Video ^[3]

Ultra-smooth and crisp footage.

4K/100fps Slow Motion ^[3]

Capture every detail in stunning slow motion.

2.7K Vertical Recording ^[3]

More flexibility for creative angles.

Perfectly capture fast-paced action, from running athletes to splashing waves.

Slow down fleeting moments to highlight rich details and create visually dramatic, high-impact scenes.

Smart Modes for Intuitive Creation

DJI Lito 1 features a variety of intelligent modes. Simply select a function, and the drone performs complex camera moves automatically. Even beginners can effortlessly capture and edit stunning footage in one seamless process.

Intelligent Modes

Multiple smart flight modes for effortless creativity.

Automated Camera Moves

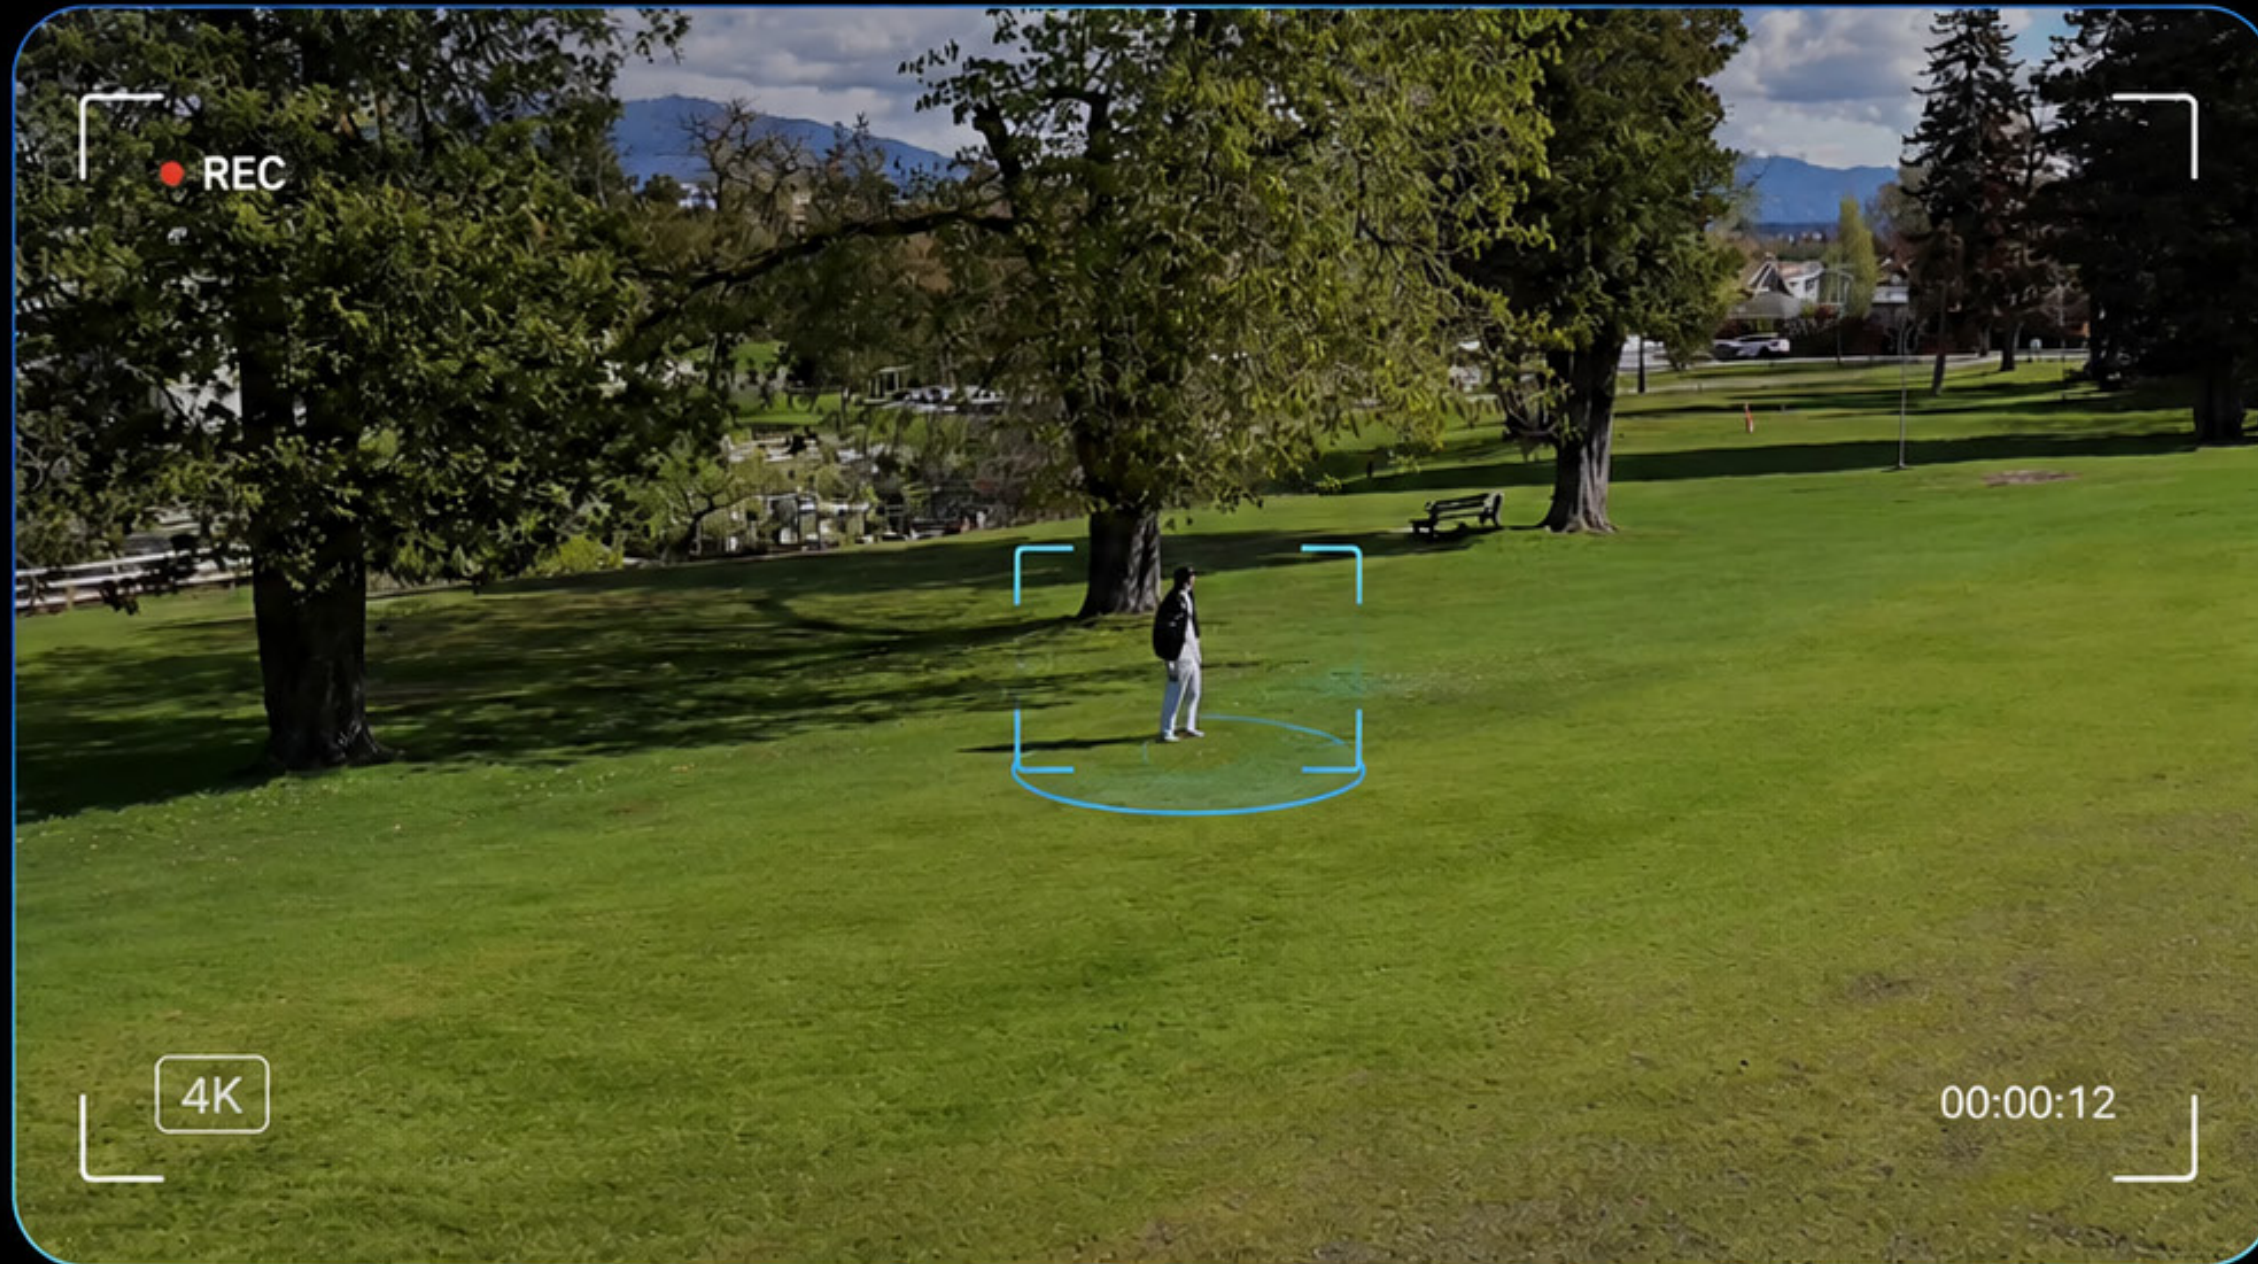

Performs complex movements automatically, with cinematic precision.

Beginner Friendly

Easy to use, delivering stunning results in one seamless process.

Smart Camera Moves at Your Fingertips

Intelligent Flight Paths

Automatically plans the best camera movements for stunning results.

Hands-Free Recording

Focus on your creativity while the drone handles the complexity.

Cinematic Results

Capture professional-looking videos with just a tap.

Beginner Friendly

Easy to use, yet powerful enough to bring your ideas to life.

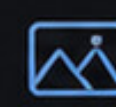

QuickShots

MasterShots

Hyperlapse

Panorama

Intelligently generates flight paths for portraits, close-ups, or landscapes based on the environment. Records and edits automatically, making impressive videos accessible to beginners.

Safer Flights, More Confidence

DJI Lito 1 offers a multi-layered safety system designed for beginners. From omnidirectional obstacle sensing^[1] to practice on DJI Simulator and quick takeoff capabilities, it reduces flight anxiety so you can fly with ease every time.

Omnidirectional Obstacle Sensing^[1]

DJI Lito 1 detects obstacles along its flight path in all directions and intelligently brakes or bypasses them^[1]. This provides a smoother flying experience, empowering beginners to explore the skies with peace of mind.

Detects in All Directions

Intelligent Avoidance

Smooth & Stable Flight

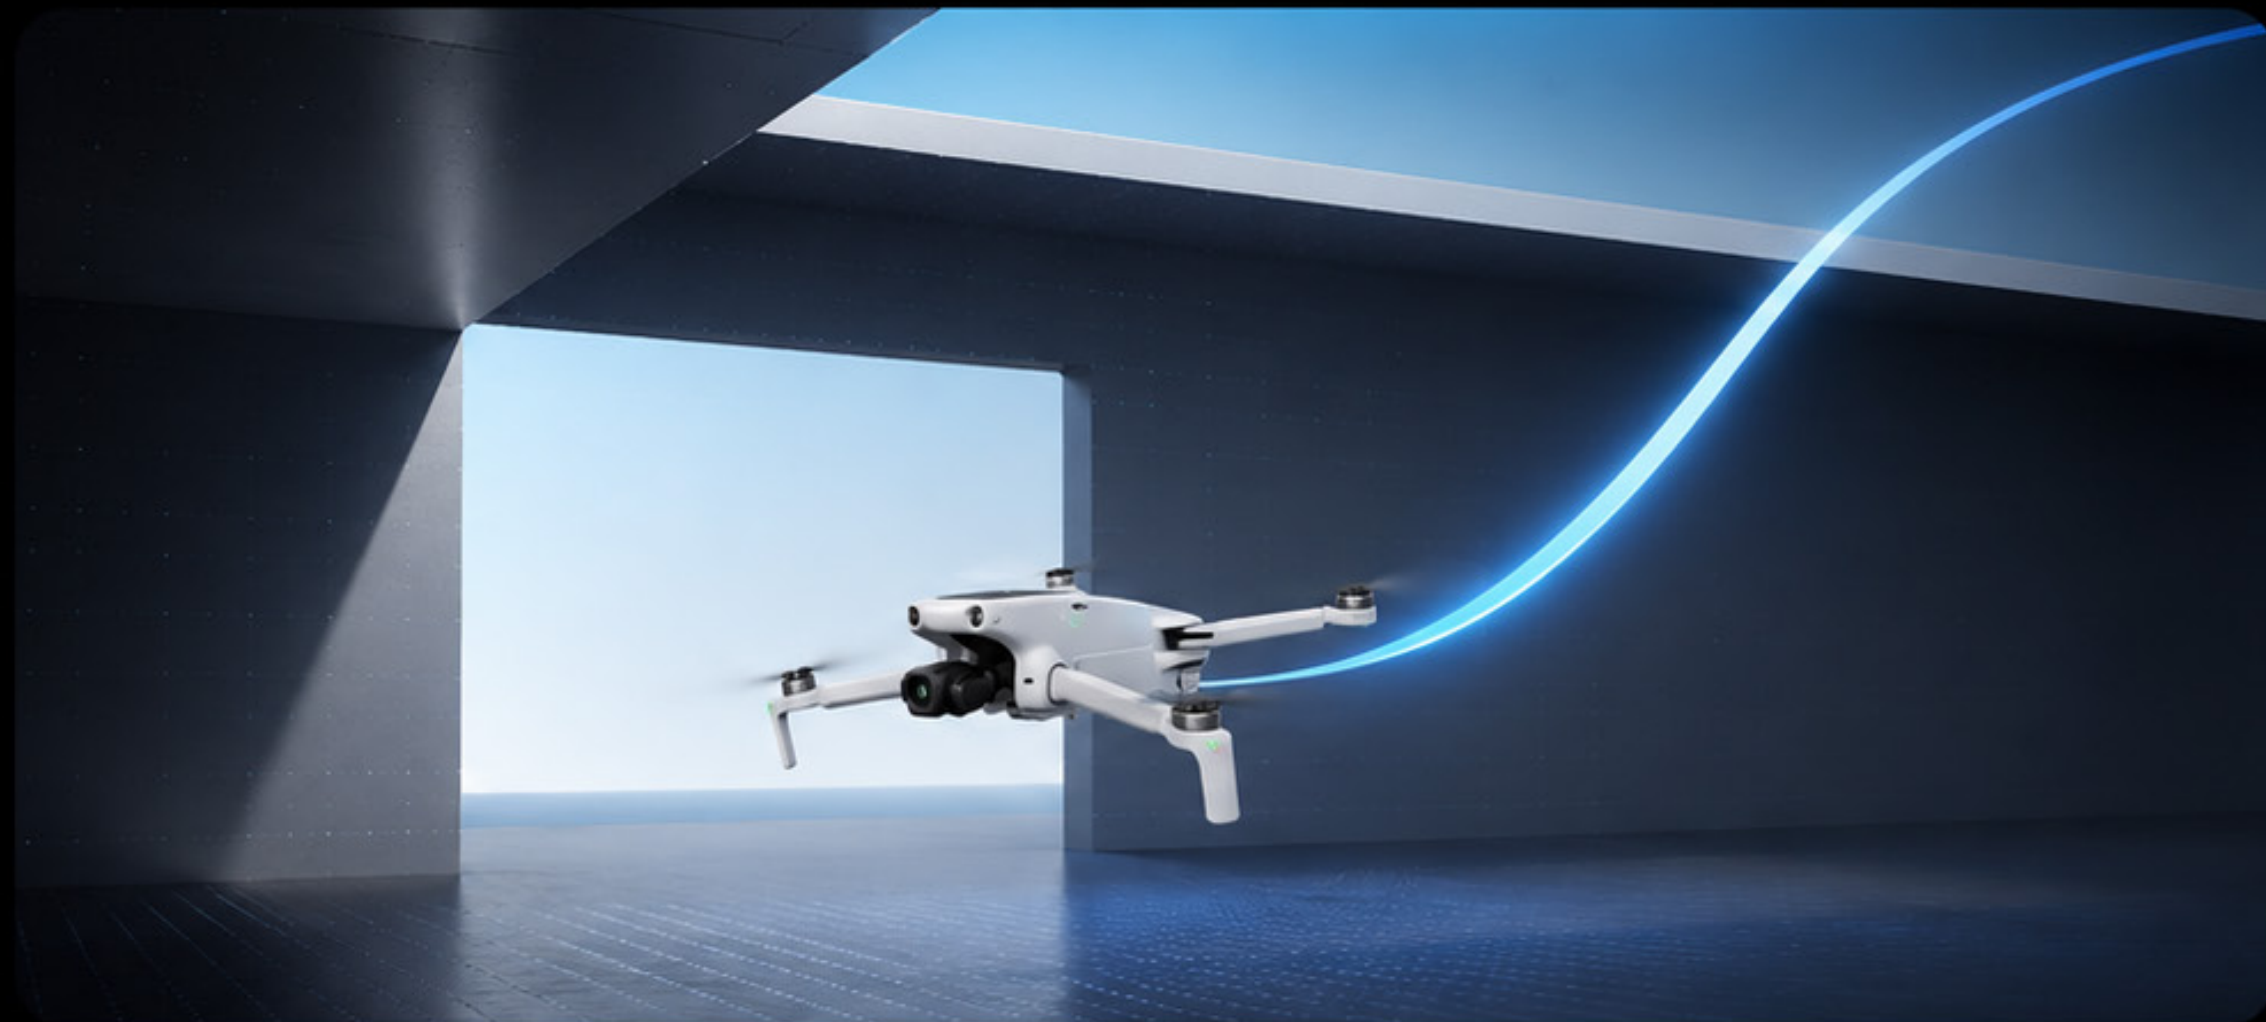

Beginner Friendly

Quick Takeoff and Reliable **RTH** Feature

In dense urban areas with weak satellite signals, DJI Lito 1 can take off quickly without waiting for a satellite fix. During the final stage of Return to Home (RTH), it can fly back along its original outbound flight path, helping ensure a safe return even with poor satellite signals^[9].

Practice Safely with **Simulator App**

Available on iOS and Android, the DJI Simulator app helps you get familiar with flight controls in lifelike virtual environments. Build confidence with basic controls and explore smart features that help make flying easier, all from home.

Stable Transmission and Ample Flight Time

The DJI O4 video transmission pairs with ample battery time to let you explore further and see stable views, helping you capture memorable footage without worrying about transmission drops or battery depletion.

O4 Video Transmission for Stable Visuals

DJI O4 transmits a 1080p/60fps live view with a range of up to 15 km^[7]. Enjoy fluid visuals for a responsive flying experience.

Up to 52 mins^[6]
Intelligent Flight Battery Plus

Create With Ease and Efficiency

From fast transfers to wind resistance, all these details are designed for a smoother, more reliable creative process.

QuickTransfer

With **Wi-Fi 6**, download **32 GB** of footage wirelessly in just **11 minutes** at the max speed ^[10].

Parallel Charging

The Charging Hub charges **three batteries** simultaneously ^[11], reducing wait time so you are ready to go.

Level 5 Wind Resistance

Resists **Level 5 winds** (**10.7 m/s**), which helps ensure stable hovering and reliable outdoor video capture.

Diverse Combos for Your Needs

DJI Lito 1 offers various combos to meet your flight needs.
Choose your ideal setup and start capturing your life's highlights today.
