Product

Highlights

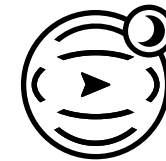

Camera:
1" CMOS, 50MP

Takeoff Weight
249.9 g

4K/60fps HDR or
4K/120fps slow motion

Nightscape
Equipped With Vision +
Forward- Facing LiDAR

Max Flight Time: 52
minutes with "Plus"
Intelligent Flight
Battery

Built-in 42 GB internal
storage + microSD
support

Camera System

A 1-inch CMOS sensor is integrated into the Mini 5 Pro, enabling 4K/60fps HDR video recording with up to 14 stops of dynamic range for stunning images. Enhanced by sophisticated algorithms and modern image-processing technology, this big sensor captures even the smallest details in low-light situations, such as nightscapes and sunsets, producing photographs that are utterly stunning. Subjects are more noticeable in the frame when using the 48mm Med-Tele mode, and portrait optimization algorithms capture each expression with amazing detail.

Video Recording

4K/60fps HDR

4K/120fps slow motion

1" Large CMOS Camera

1-inch CMOS, 50 MP

48mm Med-Tele mode with 2x zoom

Extended Battery Life

Innovative Charging

Max Air Time With Intelligent
Flight Battery Plus:

52 Min

Max Air Time With Standard
Intelligent Flight Battery:

36 Min

Native vertical shooting 225° gimbal rotation for flexible framing

Flexible, dynamic camera motion Works with Quick Shot
Rotate, Timelapse, Spotlight, Waypoint
Easy, creative rotating shots True Vertical
Shooting for Instant Sharing

Range and Transmission

O4+ video transmission supports a range of up to 20 km, using DJI's latest transmission algorithm for stronger anti-interference and more stable, reliable live feeds. Reliable Video Transmission and Extended Flight Time

Omnidirectional Vision Sensing System

Forward LiDAR, front/rear fisheye, and bottom binocular + 3D IR enable true 360° obstacle sensing.

360° Obstacle Avoidance:

The Mini 5 Pro's clever obstacle avoidance mechanism allows you to fly with confidence. Even in challenging situations, its sensors are able to identify and steer clear of obstructions in all directions, guaranteeing safe and easy flight.

Smart Flight Modes:

With features like Active Track, Master Shots, and Quick Shots, you can unleash your creative potential. The DJI Mini 5 Pro's automated intelligent flight modes make it easy for even novices to record cinematic footage.

Accurate GPS Guidance The Mini 5 Pro's sophisticated GPS and positioning system provides precise navigation and steady flights. It maintains dependable control and positioning in both broad fields and urban areas.

Nightscape Omnidirectional Obstacle Sensing

Strong night-shooting safety

Dual-Band GNSS

L1+L5 dual-band GNSS locks more satellites for steadier signals and pinpoint positioning.

Optimized Tracking Performance

Once tracking begins, DJI Mini 5 Pro can keep the subject in focus even if the lower half of their body is partially obscured by bushes or if they are standing on a bridge.

Upgraded ActiveTrack 360°

The Mini 5 Pro's clever obstacle avoidance mechanism allows you to fly with confidence. Even in challenging situations, its sensors are able to identify and steer clear of obstructions in all directions, guaranteeing safe and easy flight.

Specifications

Takeoff Weight	249.9 g
Dimension	255 × 181 × 91 mm
Max Pitch Angle	36°
Max Ascent Speed	10 m/s
Max Descent Speed	8 m/s
Max Speed	19 m/s
Max Takeoff Altitude	4,500 m (with Plus battery)
Max Flight Time	52 mins (with Plus battery)
Max Flight Distance	20 Km

Max Wind Speed Resistance	12 m/s
ISO Range	Normal: 100–12800; D-Log M / HLG: 100–3200
Camera Sensor	1-inch CMOS, 50 MP
Video Resolution	4K/60fps HDR, 4K/120fps slow motion
Zoom / Telephoto Mode	48 mm medium-telephoto crop / 2× digital zoom
Sensor	Omnidirectional vision system + forward LiDAR (Nightscape support)

In the Box

Mini 5 Pro Drone ×1

DJI RC 2 Controller ×1

Intelligent Flight Battery Plus ×3

Two-Way Charging Hub ×1

ND Filter Set (ND8/32/128) ×1

Spare Propellers (pairs) ×3

Shoulder Bag ×1

USB-C Cable ×1

Storage Cover ×1

Bangalore:
Fourth Floor, #1664, 27th Main,
